  - (i) There are four alternatives for the answer to every question. For each question for which a wrong answer has been given by the candidate, **one-third (0.33)** of the marks assigned to that question will be deducted as penalty.
  - (ii) If a candidate gives more than one answer, it will be treated as a **wrong answer** even if one of the given answers happens to be correct and there will be same penalty as above to that question.
  - (iii) If a question is left blank, i.e., no answer is given by the candidate, there will be **no penalty** for that question.

**DO NOT OPEN THIS TEST BOOKLET UNTIL YOU ARE ASKED TO DO SO**

**Directions (For the 10 items which follow) :**

- (i) In this section, a number of sentences are given. The sentences are underlined in three separate parts and each one is labelled (a), (b) and (c). Read each sentence to find out whether there is an error in any underlined part. No sentence has more than one error. When you find an error in any one of the underlined parts (a), (b) or (c), indicate your response on the separate Answer Sheet at the appropriate space. You may feel that there is no error in a sentence. In that case, letter (d) will signify a 'No error' response.
- (ii) You are to indicate only one response for each item in your Answer Sheet. (If you indicate more than one response, your answer will be considered wrong.) Errors may be in grammar, word usage or idioms. There may be a word missing or there may be a word which should be removed.
- (iii) You are **not** required to correct the error. You are required **only** to indicate your response on the Answer Sheet.

Examples 'P' and 'Q' have been solved for you.

P. The young child singed a very sweet song. No error  
(a) (b) (c) (d)

**Directions (For the 10 items which follow) :**

In this section, you have **two** short passages. After each passage, you will find several questions based on the passage. First, read a passage and then answer the questions based on it. You are required to select your answers based on the contents of the passage and opinion of the author only.

Examples 'I' and 'J' have been solved for you:

**PASSAGE (EXAMPLE)**

In our approach to life, be it pragmatic or otherwise, a basic fact that confronts us squarely and unmistakably is the desire for peace, security and happiness. Different forms of life at different levels of existence make up the teeming denizens of this earth of ours. And, no matter whether they belong to the higher groups such as human beings or to the lower groups such as animals, all beings primarily seek peace, comfort and security. Life is as dear to a mute creature as it is to a man. Even the lowliest insect strives for protection against dangers that threaten its life. Just as each one of us wants to live and not to die, so do all other creatures.

- I. The author's main point is that
- (a) different forms of life are found on the earth
  - (b) different levels of existence are possible in nature
  - (c) peace and security are the chief goals of all living beings
  - (d) even the weakest creature struggles to preserve its life

- J. Which one of the following assumptions or steps is essential in developing the author's position?
- (a) All forms of life have a single overriding goal.
  - (b) The will to survive of a creature is identified with a desire for peace
  - (c) All beings are divided into higher and lower groups
  - (d) A parallel is drawn between happiness and life, and pain and death

**Explanation :**

- I. The idea which represents the author's main point is "peace and security are the chief goals of all living beings", which is response (c). So (c) is the correct answer.
- J. The best assumption underlying the passage is "The will to survive of a creature is identified with a desire for peace", which is response (b). So (b) is the correct answer.

PASSAGE—I

Have you ever heard a parrot or a pet talk? Or perhaps you have seen the roadside astrologer who has a couple of parrots in his cage, which, at his command, picks out your fortune card from a pile of cards. You may also have heard of pigeons which once acted as messengers.

All these make you ask the question : are birds intelligent? Can they learn things? Formerly the biologists thought that birds could not learn anything, because their brains were too small and too simple, compared to the intricate nervous system, and brain of higher animals. They can act only by instinct, following certain fixed behavioural patterns. Recent studies have shown that bird behaviour is a combination of instinctive or fixed behaviour and learned or flexible behaviour.

51. The given passage deals with
- (a) bird behaviour
  - (b) the learning capacity of birds/pets
  - (c) the roadside astrologer
  - (d) the use of instinct and command by birds
52. The writer evidently
- (a) believes that birds are intelligent by birth
  - (b) suggests that birds can learn by practice
  - (c) negates the capacity of birds
  - (d) likes to experiment with pets
53. Formerly the biologists thought birds could not learn anything because
- (a) they blindly follow their instinct
  - (b) they are only interested to eat
  - (c) they do not have an intricate nervous system
  - (d) None of the above
54. Recent studies have shown that birds behave in a particular/peculiar way because
- (a) of training and hard-work
  - (b) they have such unborn qualities
  - (c) they listen to the command of their instinct
  - (d) of their instinctive or fixed behaviour and learned or flexible behaviour
55. What can be the most suitable title to the passage?
- (a) Birds and other pets
  - (b) Birds : their instinct and behaviour
  - (c) How to train birds?
  - (d) The brain of birds

## PASSAGE—II

In the early decades of the twentieth century, German was one of the important languages of scientific communication. A scientist did not need the knowledge of any other language to stay abreast of current developments in his/her field. But a recent survey shows that scientists are using German less and less, and are switching over to English. Even in the field of medicine, where on the whole, German still occupies a place of importance, the general trend is towards English.

Greek was the language in which medical treatises appeared. In the Middle Ages, Latin was the language of learning in the countries of Europe. In the eighteenth century, the national languages displaced Latin. In Germany, doctors began to use German. Now, in the last thirty years, there has been a further change. English has become the best, perhaps the only medium, through which communication with a wider audience is feasible.

56. What is the reason for the decline in the use of German as a language for medical writing?
- (a) German's defeat in the World War II
  - (b) The preference of English worldwide with a larger audience
  - (c) The first medical treatise did not appear in German
  - (d) English is easier than German
57. What was the language in which the first medical treatises appeared?
- (a) English
  - (b) French
  - (c) Greek
  - (d) German
58. In the given context, the author recommends the use of English in medical books because
- (a) English has a universal appeal and it keeps abreast of current developments
  - (b) English has replaced most national languages
  - (c) most medical journals are published in English
  - (d) scientists are using less and less German
59. The author suggests that if a scientist wants to stay abreast of current developments in his/her field, he/she must
- (a) read medical magazines in all languages
  - (b) read medical magazines only in English
  - (c) travel across the globe
  - (d) learn all national languages
60. The most suitable title to this passage is
- (a) English versus German
  - (b) English as a medium of communication
  - (c) Medical science
  - (d) English as the language of medical sciences
